

CRITERION - TW 600

The **TW 600** is a completely new development in active sub-woofers, based on our TCI High-End active loudspeakers. Our switching output stages are an in-house development, and are of discrete construction (we don't use ready-made 'off the peg' chips). They have proved extraordinarily effective in practice: their dynamic characteristics and speed are unexcelled, as are their power reserves and sound qualities.

The **TW 600** is also fitted with the sophisticated cone regulation system of the TCI, which controls the lower limit frequency of the two bass systems as well as the cone travel. By this means we have achieved a quality of low bass reproduction at really high levels that would not be possible in any other way. The active unit offers many sensible set-up facilities, such as variable limit frequencies, continuous level regulation and phase governing, protective circuitry, an automatic power-on circuit and a processor which controls the filters perfectly in stereo and surround mode (SC link) when used in conjunction with other T+A equipment. The **TW 600** makes your home cinema set-up into a system which will shake your very foundations!

Specifications

<i>Nominal output</i>	320 Watt
<i>Maximun music power</i>	500 Watt
<i>Frequency range</i>	20 – 150 Hz
<i>Drive unit (bass)</i>	2 x 220 mm
<i>Corssover frequency</i>	40 - 150 Hz
<i>Dimensions H x W x D</i>	65 x 26 x 38 cm
<i>Weight</i>	25 kg
<i>Finishes</i>	Bird's-eye maple wood veneer, Cherry stain, Walnut, Silver, Black

Unfortunately foto's mostly don't look the same on different pc-screens. Therefore the pictures can only give you a rough impression of the colours.
