

## INFORMATION

**TALIS TLP 10**

The Talis **TLP 10** is a true multi-talent, as it can be employed as a Hi-Fi speaker, a centre speaker or a panel loudspeaker in a conventional stereo system, in a home cinema setup or a surround system.

The **TLP 10** is only 11 cm deep, making it ideal for positioning adjacent to flat-screen televisions, yet its effective volume is relatively large thanks to its aluminium cabinet. The two 14 cm bass / mid-range units can handle extremely high levels whilst producing a very clean, dynamic sonic image.

In conjunction with the super annular tweeter these drive units generate a very open, clearly defined sound stage. This is very important for good voice reproduction and comprehensibility of speech. These characteristics make it an ideal loudspeaker for digital surround systems; it can be used both as main and rear loudspeakers, and also as the centre unit.

For the latter application it should be set up as close to the television set as possible (for which reason its powerful magnets are thoroughly shielded), where it is responsible for the clear reproduction of human voices.

**Specifications**

<i>Nominal power-handling</i>	90 W
<i>Music power-handling</i>	140 W
<i>Impedance</i>	4 Ohm
<i>Frequency response</i>	45 - 45000 Hz
<i>Power requirement (90 dB / 1m)</i>	2,2 W
<i>Bass / mid-range drive units</i>	2 x 140 mm
<i>High-frequency drive units</i>	1 x 35 mm
<i>Crossover frequencies</i>	2000 Hz
<i>Dimensions H x W x D</i>	15 x 54 x 11 cm
<i>Weight</i>	8 kg
<i>Finishes</i>	black, silver, white
