2 x 152 mm

Drive units midrange

1 x 120 mm

Drive units highrange

1 x 25 mm

Crossover frequencies

300 / 2000 Hz

Dimensions / Weight

92 x 19 x 32 cm / 17 kg

The Pulsar ST 21 represents a further development of the successful Pulsar ST 20. We have improved it significantly, in acoustic as well as visual terms, but cautiously. Although it is very slightly larger than its predecessor - a factor which benefits the speaker's bass response in particular - it remains an extremely slim, compact floor-standing speaker with great clarity of form and puristic design. We have improved the linearity and dynamism of the bass and mid-range drivers, and also developed a new treble dome unit which is even lighter, generating an open, airy sound image. The new high-performance drive units satisfy the most exacting demands, and the ST 21 is effortlessly capable of radiating deep, clean bass at high pressure levels. It reproduces the mid / treble range in an open, dynamic and neutral manner.
