Outstanding technologies combined perfectly

T+ A elektroakustik and berbel developed the Skyline Edge Sound exhaust hood

Herford, May, 12th 2017: Berbel Ablufttechnik GmbH stands for high-quality exhaust hoods. The German manufacturer T + A for audio technology in the top high-end range. Together, they created the Skyline Edge Sound. The central space positioning of the Skyline Edge Sound allows an all-round sound experience. The speakers are installed invisibly to the outside.

The hood with its significant light slit fascinates with full sound - before, during and after cooking. For those who understand their kitchen as a living space. The integrated sound system is easily operated via a W-LAN connection and the T + A Control App, which is available for iOS and Android devices. The Skyline Edge Sound is available in March 2017 in the width of 135 cm.

The multiple award-winning Skyline Edge has not only set new standards in kitchen air cleaning due to its exceptional floating design. Technical details like the lift function (up to 1,200 mm), the glare-free LED cooking field lighting as well as the effect lighting in the glass-finished ceiling plate make it so unique in combination with the berbel-developed JetStream technology.
