

Centerspeaker - CRITERION TALC 120

The TALC 120 is equipped with two shielded 180 mm bass/mid-range drivers with cast aluminium cradles and aluminium cones, working in a large cabinet with phase compensation and absorber. The 26 mm woven dome high-frequency unit (also shielded) of the large Criterion loudspeakers is ideally suited to the demanding application of the centre channel. The cabinet features multiple stiffening members, and its bevelled edges make an important contribution to its excellent spatial imaging capability. In fact, the TALC 120 represents a genuine full-range loudspeaker which can even reproduce the lowest frequencies with enormous power. With this all-round ability in mind, the TALC units can be used as a pair for the front speakers, a further pair for the rear, and a fifth for the centre in a digital surround system. However, since the sonic characteristics of all Criterion series loudspeakers are very similar, there is no problem in combining this unit with any other models in the range.

Specifications

<i>Principle</i>	2 – way absorber line centre speaker
<i>Nominal power rating</i>	120 Watts
<i>Music power rating</i>	150 Watts
<i>Impedance</i>	4 Ohms
<i>Frequency response</i>	35 – 30000 Hz
<i>Sensitivity 90 dB/1 m</i>	2,1 Watst
<i>Bass drive unit</i>	2 x 170 mm
<i>High-frequency drive unit</i>	1 x 26 mm
<i>Crossover unit, type</i>	FSR
<i>Crossover frequencies</i>	2500 Hz
<i>Bi-amping</i>	yes
<i>Dimensions H x W x D</i>	20 x 54 x 40 cm
<i>Weight</i>	15 kg
<i>Colours</i>	Natural beech, natural alder, white lacquer rubbed, black lacquer rubbed, silver lacquer rubbed, Shielded
