

Subwoofer - CRITERION TALW 150A

The TALW 150 A is a large, active sub-woofer based on a pair of 260 mm bass drivers, each with a carbon fibre cone mounted in a rigid, pressure cast magnesium cradle. The large cabinet is extensively braced internally, and features a phase compensation opening and absorber. A new high-power active unit is fitted, rated at 120 Watts, which produces a peak current of 15 Amps. Active deep bass regulation, variable limit frequency, level control, and an automatic protective circuit make it easy to set up the speaker to suit any combination of existing loudspeakers.

Specifications

<i>Principle</i>	Active subwoofer, Absorber line
<i>Nominal power rating</i>	125 Watts 4 Ohms
<i>Music power rating</i>	180 Watts 4 Ohms
<i>Frequency response</i>	20 - 150 Hz
<i>Bass drive units</i>	2 x 260 mm
<i>Crossover unit, type</i>	Active unit infinitely
<i>Crossover frequencies</i>	variable from 40 to 150 Hz, high-pass filtered satellite outputs
<i>Dimensions H x W x D</i>	65 x 32 x 44 cm
<i>Weight</i>	26 kg
<i>Colours</i>	Natural beech, natural alder, white lacquer rubbed, black lacquer rubbed, silver lacquer rubbed
	Volume control
	Auto-power-on
	Phase reverse
	Excess temperature / short circuit protection
