

Centrespeaker - CRITERION TCI C2

The **TCI C2** is an extremely innovative centre loudspeaker, designed to form the speech focal point in a high-end surround system. That's why it's so important! We have equipped the speaker with the finest sub-assemblies from the TCI series, including the high-tech mid-range unit and the ethereal electrostatic high-frequency units. It also features the carbon fibre bass drivers employed in the **TCI 3R**. All this means that the **TCI C2** is a genuine full-range loudspeaker, designed to be set up as a small floor-standing unit under the screen, or immediately adjacent to it. This centre speaker exhibits the incredible dynamic range, exemplary high resolution and ability to operate at very high levels as the rest of the TCI series.

It has often been said that the centre is the most important speaker in any high-end surround system. With this innovative, no-compromise loudspeaker we have satisfied the most demanding of all requirements in this area.

Specifications

<i>Principle</i>	3 – Way – Center floorstander
<i>Nominal power rating</i>	140 Watt
