

Compactspeaker - PULSAR TAR 520

This compact 2-way loudspeaker features a 20 mm woven dome tweeter and a 19 cm magnesium bass unit. The bass output is simply gigantic for such a compact loudspeaker, and its overall sound characteristics are very impressive: airy, open, dynamic and capable of high levels at all frequencies. This makes it a great choice for the demanding Hi-Fi enthusiast who does not like large speakers, and also as the main and rear loudspeakers in a movie-fan's surround system.
