

## Compactspeaker - TALIS TLR 1

The Talis **TLR 1** is a genuine mini-speaker, albeit only in terms of its physical size. Although it is a mere 10 cm wide, 11 cm deep and 21 cm tall, it sounds like a large speaker and can cope with considerable levels. The high-quality two-way design consists of a bass / mid-range unit with large magnets and aluminium cone and a 25 mm woven dome tweeter. A refined crossover unit with low bass equalisation produces a harmonious and natural sounding unit which really does amaze the listener. The **TLR 1** is highly versatile: they can be employed as small Hi-Fi speakers, as rear speakers in a surround system, or can be combined with a [TLW-2A](#) active sub-woofer to form a high-end satellite system.

### Specifications
