

**INFORMATION**
**TALIS TLW 2A**

The **TLW 2 A** active sub-woofer is one of the most impressive and best-looking loudspeakers to be found in our range. It is simply incredible how clean and natural the bass generated by this small sub-woofer can be, and how hard it can be driven.

A solid aluminium cabinet of sheer elegance (incidentally resistant to ornamental plants) houses two dynamic and two parasitic speakers, driven by a completely new active unit offering 320 Watts continuous power.

The drive units are unique: gigantic magnets acting upon heavy aluminium cones, capable of producing powerful pressure waves at very low frequencies. As in the R-series, the active unit is equipped with discrete output stages for superb sound quality, and has more than enough power to generate enormous levels.

An active frequency-dependent, level-dependent regulatory circuit is included, ensuring that the sound is always undistorted and natural.

Comprehensive adjustment facilities enable the **TLW 2 A** to be used in any location and system. Variable parameters include lower limit frequency, separation frequency, level, phase and power-on mode.

**Specifications**

<i>Principle</i>	Active Subwoofer, parasitic speakers
<i>Nominal power rating</i>	320 W / 4 Ohm
<i>Music power rating</i>	450 W
<i>Bass drive unit</i>	4 x 170 mm
<i>Frequency response</i>	30 - 150 Hz
<i>Crossover frequency</i>	active , infinitely variable from 30 - 150 Hz
<i>Dimensions H x W x D</i>	52 x 21 x 21 cm
<i>Weight</i>	18 kg
<i>Colours</i>	black (RAL 9005), silver anodised aluminium, Chrome, non standard RAL colour (extra cost option)
